

SOFTWARE ENGINEER - DATA ENGINEERING

Job Summary

We are looking for a passionate Software Engineer to design, develop and implement Solution for Data Engineering and Product Development for DevOps, BigData and Data Science. The successful candidate will be able to build high-quality, innovative and fully performing software in compliance with coding standards and technical design.

Job Description

- Design, develop, test, deploy, maintain and improve the software.
- Manage individual projects priorities, deadlines and deliverables.
- Efficient Code and Documentation of the Project.
- Proper Github Process Flow Implementation and Coding Best Practices.
- Review and influence ongoing design, architecture, standards and methods for operating services and systems.

Requirements

- Software development experience in one or more general purpose programming languages.
- Building Data Solutions for High Volume of Transaction Data.
- Strong Knowledge of Algorithms and Data structures.
- Knowledge about test-driven development.
- Strong knowledge of Databases - SQL/NoSQL Databases and Graph Databases.
- Working proficiency and communication skills in verbal and written English.

Preferred qualifications:

- Experience with one or more general purpose programming languages including but not limited to: Java, C/C++, C#, Objective C, Python, JavaScript, or Go.
- Interest and ability to learn other coding languages as needed.
